## ABOUT LUFF

# Company Overview

---

Luff Mechanical is a Pilbara-based mechanical business providing servicing, repairs, and site support across cranes, vehicles, and heavy equipment.

We specialise in crane repair and servicing, with strong expertise across light vehicles, earthmoving equipment, and civil machinery. We understand the demands of remote and industrial environments and pride ourselves on being responsive, reliable, and easy to deal with. Our reputation is built on strong relationships, honest advice, and quality workmanship that keeps our clients moving.

## KEY PERSONNEL

# Our Directors

Jordan and Luke have worked together across Australia, building a strong professional partnership grounded in reliability, practical problem-solving, and quality workmanship.

After identifying a significant gap in the Pilbara mechanical industry, they saw an opportunity to deliver a more responsive, solutions-focused service built around genuine customer support and high standards of work. With a shared can-do attitude and extensive hands-on experience, they founded Luff Mechanical Pty Ltd to provide dependable crane repair and mechanical services the region can rely on.

Today, Luff Mechanical is an emerging leader in crane repair across the Pilbara, trusted for consistent, high-quality workmanship and fast, reliable service.

## CAPABILITIES

# Our Services

Our services are designed to minimise downtime, support safe operations, and keep equipment performing at its best in demanding environments.

## Crane Repair & Servicing

Cranes are our core specialty. We provide servicing, maintenance, and repairs to support safe, compliant, and reliable crane operation across industrial and civil worksites.

Our crane services include:

- Scheduled servicing and inspections
- Fault diagnosis and mechanical repairs
- Breakdown support
- Preventative maintenance

## Mechanical Servicing & Repairs

We service and repair a wide range of light vehicles, earthmoving equipment, and civil machinery used across mining, construction, and industrial sites.

Services include:

- Routine servicing
- Mechanical repairs
- Breakdown response
- Shutdown maintenance support

## Auto Electrical Services

Luff Mechanical provides auto electrical servicing across all types of plant and machinery. We support fault finding, repairs, and electrical system maintenance to keep equipment operating safely and reliably.

## Automotive & Heavy Vehicle Air Conditioning

We offer servicing and repairs for automotive and heavy vehicle air conditioning systems, ensuring operator comfort and system compliance in harsh conditions.

## Labour Hire & Shutdown Support

We provide flexible labour hire and shutdown support, supplying experienced mechanical support when extra resources are required.

Our team can integrate seamlessly into site operations to support maintenance programs, shutdowns, and short-term workforce requirements.

## Breakdown & Emergency Repairs

We understand that breakdowns can't wait. Luff Mechanical offers fast response breakdown support to get equipment back up and running as quickly and safely as possible.
